Question: can you use it without a phone, my kid, I am buying it for doesn't have a phone?

Answer: Definitely! My son never uses a phone when he rides.

Question: How do I keep the speed on the app at the lower speed? It keeps switching back to the higher speed!

Answer: Hi, thanks for your message. When you selected the speed you want to ride on, then you need to click the "limited speed" at the bottom, when it shows "setting successfully", and it could be fixed. Or you could directly adjust into kids mode, the speed would be in very slow. Hope this could be workable for you.

Light and sleek. Rated 265 lbs. We bought this and a H1 and so far like this one better. It is easier to handle with one handed lifting if you are strong as the middle is smaller. The charger is very similar to the H1. This is only a initial review.

So after a month the unit still works but the plastic hubs are showing some damage and some plastic peices are rattling around inside. We havnt been gentle with it though ;).

★★★★★ **Great value, great experience so far**

Reviewed in the United States on March 10, 2020

I did alot of research on hoverboards. What I found was every single one has a few reviews of people saying their's was defective or did nothing but beep. Basically I took a leap of faith guided by my 6 year old daughter's simple request for pink. I have now had this Gyroor for a week and I am very happy with the purchase thus far. First, my daughter loves it and was zipping around all over the place in no time. The lights are bright and colorful. The app is easy to pair and use. I put it in child mode and limited the speed in minutes. It can support 220lbs according to the manual which should make it big brother survivable. Battery life has been excellent and the charge time of 2-3 hours is quicker than I expected. So far my only nit-pick would be I think the cosmetics of the plastic body could be scratched up and gouged pretty easily. But it does feel like a solid piece of machinery. That it comes with a bag is really nice. At this point I feel like I hit the sweet spot of not going too cheap while keeping the price reasonable for a 6 year old. I'll update in a couple months

Bought this for my 11 yr old daughter for Christmas. She loves it. All her friends got one too and paid about the same price but hers is cooler than them all. The Bluetooth speaker works great and is very loud. She jumped on and became a pro in about 15 minutes.

Battery didn't last more then 30 minutes. Got the item replaced and had the same problem. The company was quick to resolve thing but only refunded to amazon account not to original payment method. I should also mention when it stops working or dies unexpectedly it comes to a complete stop. Making the rider go flying!

☆☆☆☆☆ **My son loves it (UPDATE)**

Reviewed in the United States on September 2, 2020

Color: black | [Verified Purchase](#)

We purchased this about a year ago and my 9 year old son has a blast with it! It stood up well for some time and then the battery would only last for a few minutes. I saw that the battery warranty was only 6 months but figured I would contact Gyroor directly and see if there was anything they could do. I was pleasantly surprised when they told me they would send me a new battery! Needless to say I am very happy with the product and their customer support.

UPDATE 1/25/2021 - So Gyroor wound up sending me the wrong battery, and then asked me to ship the entire hoverboard back so they would fix it. I sent it back and they sent me back a hoverboard where the bottom was not fully screwed in and the threads were stripped.

They then sent me another hoverboard that had the SAME EXACT ISSUES. Now they are saying they don't have it in stock and will send me a new one once it is in stock. It has been about 6 months since I had this initially had this issue which is not an acceptable amount of time. If I do finally received a working hoverboard that is also safe to use I will update this review again.

Got this for my granddaughter for Christmas! After setting it up to her mother's phone, it took a couple of days and learning beside something to hold on to while getting the feel of things. (of course we had a few laughs at her dad's expense) She is now scooting around as well as she rides her bicycle. She is having a blast! The slower learning feature was perfect for her to use until she got the hang of riding it.
